

OUTSTANDING DEMENTIA CARE PRODUCT

TOVERTAFEL (MAGIC TABLE)

WHAT IS THE TOVERTAFEL?

The Tovertafel ('Magic Table' in Dutch) contains a series of games for people living with mid to late stage dementia, engineered to encourage instinctive participation, inviting engagement and stimulating a level of physical and social activity rarely seen in people living with dementia at that

stage of their journey. The beautiful games were developed specifically for each target group and can be played both independently and under supervision.

The games consist of a series of interactive light animations that are projected on any table and which motivate the mind and inspire those living with dementia to be active. Moreover, the Tovertafel creates treasured moments with family members and carers. These games are all about enjoyment and wonder.

The Tovertafel is a box that can be mounted on the ceiling above any table in a care centre. Inside the box there is a high-quality projector, infrared sensors, speaker, and processor that work together to project the games onto the table. Because the colourful objects respond to hand and arm movements, users get to play with the light itself.

TOVERTAFEL

Tovertafel was developed through six years of research during the PhD of our Dutch friend Hester Le Riche in collaboration with dementia care homes and therefore closely matches their needs and capabilities.

A video we launched can be seen [here](#) and one made by our Dutch

colleagues can be seen [here](#) (including subtitles).

The [Guardian](#) featured us in an article that gives a true account of the benefits.

We have other games developed for adults with learning disabilities called Tovertafel UP which you can read more about [here](#) and are developing games for children with Autism.

WHAT IS SHIFT 8 LTD?

Shift 8 Ltd, a social business founded by John Ramsay and Mehdi Bedioui, runs distribution of the Tovertafel in the UK. John's father was diagnosed with dementia when he was just 12 and he therefore has first hand experience of engaging with a family member living with dementia. After giving up his job as a corporate lawyer in London, John persuaded his friend Mehdi to join the incredible journey of bringing moments of happiness to those living with dementia throughout the UK. Here at Shift 8 we are committed to improving the level of activities in care centres to help people live well with dementia.

We are a social business determined to make a difference so there are various optional follow up services that we provide for free to ensure that the Tovertafel reaches its full potential and the investment of the care home is used properly, such as training a launch party and a volunteer programme to help inspire the next generation to get involved in dementia care.

As we build our business we are looking to raise awareness about dementia (especially amongst younger people) so it would be great to be put in touch with any contacts hoping to achieve similar goals.

WE TRULY WANT TO CHANGE THE WORLD OF DEMENTIA WITH EVERY INTERACTION!

TOVERTAFEL

FREE OPTIONAL EXTRAS

TRAINING

We are determined to make sure that the Tovertafel reaches its full potential. After an initial training session on the day of installation we also offer a second more interactive session (approximately four weeks after installation) where we invite any staff and family interested to attend.

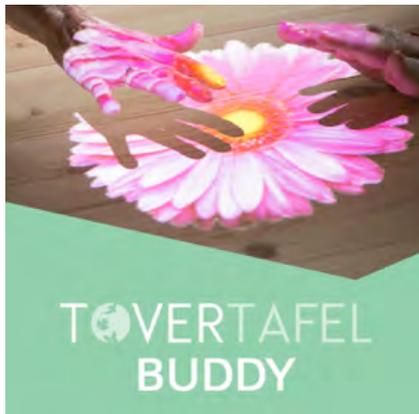

By then you should have more experience using the games and understand the tips we will share with you so that the games can help your residents, especially those who are hardest to interact with.

LAUNCH PARTY

We would love to help you organise a launch party with staff, family, friends and the wider care centre community. This can often be used as a great PR opportunity for your home and is a brilliant way to introduce the Tovertafel.

We have had local TV networks, radios and newspapers attend our past launch parties. To give you an idea we have a few videos and articles related to past launch parties on our [Facebook](#) page.

WOULD YOU LIKE TO INSPIRE THE NEXT GENERATION TO GET INVOLVED IN DEMENTIA CARE?

Would you like to make sure all staff, family members and volunteers know how to use the Tovertafel, and more importantly, keep using it?

A **Tovertafel Buddy** is a volunteer (usually aged between 17 and 23) who lives locally and can help you create moments of happiness! With at least 6 visits over 2 months, this Buddy, full of youthful enthusiasm, will actively encourage all staff, friends and family to use the Tovertafel, helping them become

comfortable with all the features and how the games can improve the quality of life for the users.
