

Laptop Recycling Scheme

Do you have a laptop you could donate to help a child/young person to access learning?

Can you create great social good for young people in Essex?

With your help we could support a huge number of children and families with their learning!

7 Access to technology can be so important to supporting a child's progress and personal development. Yet there are many children out there who do not have the luxury of a device or online access.

We are gathering old laptops to send to our partners EOL IT Services to prepare for re-use. They will erase all data and remove all identifiable markings, prior to processing and cleaning in preparation for deployment to children and young people in Essex.

If you have any old or unused laptop devices gathering dust in your business, or you're running a refresh programme and need help getting rid of your old devices, we would kindly ask you to help us support young people in Essex by donating them to our scheme.

If you have any devices to donate or more questions, please contact:
