

How to save your Daily Updates successfully

Vaccine data should be updated to support planning and ensure vaccines are prioritised to areas which need them

Total number of Residents/Patients

Total number of Residents today

This number must equal the total number of residents/patients vaccinated (show in the 'Vaccinations' section below) or data will not save and an error message will be shown at the top of the page.

Workforce

Please add your workforce figures into these boxes. The workforce figures should match the staff vaccination numbers you enter (shown in the 'Vaccinations' section below) or data will not save and an error message will be shown at the top of the page.

	Total number employed
Registered Nurses	<input type="text" value="0"/>
Care Providing Staff	<input type="text" value="0"/>
Non-Care Providing Staff	<input type="text" value="0"/>
Total	<input type="text" value="0"/>

Vaccinations

Vaccine data needs to be added for all patients/residents registered as under responsibility of the provider even if they are in hospital."

Both workforce and resident/patient numbers must be the same as the numbers entered into the workforce and resident/patient section under vaccines, or the information will not save correctly.

Number currently known to have received the first dose	<input type="text" value="35"/> Residents	<input type="text" value="3"/> Nurses	<input type="text" value="40"/> Care Staff	<input type="text" value="3"/> Non-Care Staff
Number currently known NOT to have received the first dose	<input type="text" value="20"/> Residents	<input type="text" value="2"/> Nurses	<input type="text" value="5"/> Care Staff	<input type="text" value="1"/> Non-Care Staff
Number where the first vaccine dose is not yet known or undisclosed	<input type="text" value="0"/> Residents	<input type="text" value="0"/> Nurses	<input type="text" value="5"/> Care Staff	<input type="text" value="1"/> Non-Care Staff
Reported Total	<input type="text" value="55/55"/> Residents Total	<input type="text" value="5/5"/> Nurses Total	<input type="text" value="50/50"/> Care Staff Total	<input type="text" value="5/5"/> Non-Care Staff Total
